

## **Thank You**

We receive no funding from any official body to run our Camelid TB Support and Research Group. We rely purely on donations.

Therefore when we had to raise funds for this project we sent out a plea via our website to ask for donations and it is thanks to the kind people who responded that we achieved what at the outset seemed impossible.

Our heartfelt thanks to those that made donations to this study including the Farmers Union Of Wales, British Camelids Limited, British Llama Society, Alpaka Zucht Verband Deutschland all of whom donated £1000 or more and also to the many individuals who donated amounts from 5.00 upwards.

We also have to acknowledge and show gratitude to the owners of the alpacas that were used in this trial that sadly had already died or had been euthanized as part of the DEFRA TB programme.
